

CF-FF-90-3

**RF Equipment Protection up to 3GHz**

Novaris coaxial surge protectors are designed to protect transceivers and antennas of common communication equipment from the effects of lightning and other electrical disturbances. They are available in a range of voltages to suit different power levels and in all common RF connector types. There are several optional mounting kits available.

Replaceable Protective Element

Novaris coaxial surge protectors incorporate user replaceable gas discharge tubes to ensure a long service life even in severe conditions.

Premium All-Metal Enclosure

CNC machined brass with high gloss nickel plating is utilized for the body of the product. This provides excellent durability and high frequency characteristics.

Pass-Through Design

The pass-through design allows frequencies from DC to 3GHz to be passed by the device, allowing power to be provided over the conductor in addition to the RF signals.
